

# Cloud Kienatic – Company Profile

Cloud Kienatic is a cloud-native technology company based in Chennai, Tamil Nadu, India. The company specializes in cloud computing, DevOps, data engineering, and artificial intelligence solutions for enterprises and startups.

Founded with the vision of simplifying cloud adoption, Cloud Kienatic helps organizations design, build, and scale secure and cost-effective cloud infrastructures. The company primarily works with AWS, Microsoft Azure, and Google Cloud Platform.

Cloud Kienatic provides services including cloud migration, containerization using Docker and Kubernetes, CI/CD pipeline automation, infrastructure as code (IaC), and cloud cost optimization. The company also develops data platforms using tools such as Apache Spark, Kafka, and cloud-native databases.

In the field of artificial intelligence, Cloud Kienatic builds AI-powered solutions such as document processing systems, chatbots, recommendation engines, and analytics dashboards. These solutions are designed to improve operational efficiency and decision-making.

The company serves clients across healthcare, finance, e-commerce, and logistics domains. Cloud Kienatic focuses on delivering scalable, secure, and high-performance solutions while following industry best practices.

Cloud Kienatic operates from Chennai and supports clients globally through remote-first delivery models. The company emphasizes continuous learning, innovation, and engineering excellence.
